

UNDER COUNTER

POINT OF USE WATER FILTRATION SYSTEMS

The **P.O.U. Water Filter System** eliminates unwanted substances from source water. Designed as a point of use water filter, the G.A.C. system-high grade Granular Activated Carbon-removes Chloramine, Chlorine, TCE, Benzene, pesticides, and other Volatile Organic Contaminants from drinking water (up to 99%).

TWIN UNDER COUNTER G.A.C.

2 Stage Water Filter System
With dual replaceable cartridge filters

TRIPPLE UNDER COUNTER G.A.C.

3 Stage Water filter System
With multiple replaceable cartridge filters

Stage 1- Sediment Cartridge removes sand, silt, rust and scale

Stage 2- Granular Activated Carbon Cartridge removes Volatile Organic Chemical Contaminants

Stage 3- Carbon Block Cartridge further removes V.O.C.'s and fibers to .5 micron
(Triple Filter System)
